## Select menu

Here you will find the select functionality.

### All

Select everything.

### None

Select nothing.

### Inverse

Invert the current selection.

### Linked From

Select the nodes that are linked from the currently selected nodes. The nodes before in the hierarchy.

### Linked To

Select the nodes that are linked to the currently selected nodes. The nodes behind in the hierarchy.

### Grouped

Select grouped nodes.

### Grouped Extend

Select grouped nodes, and extend from the current selection.

### Activate same type previous

Activate same node type before the current selection, step by step.

### Activate same type next

Activate same node type after the current selection, step by step.

### Find Node

This button will open a search dialog where you can search for node types and select them in the current hierarchy.
