

## 11.3.5 Editors - Shader Editor - Sidebar - Input and Modify

Input and Modify Tab.....	1
Usage.....	1

### Input and Modify Tab

Here you can find the same nodes than in the Add menu. They are a bit different organized to have the most used nodes at the top. And a panel stays open. Which makes the usage of this menu content easier. It's your decision with what system you want to work.

The appearance can be adjusted in the Iconortext panel in the View tab. Either text buttons with icons. Or pure icon buttons.

We won't explain the content of the panels again. The single nodes are explained in the add menu chapter.

Note that the Group panel starts empty. it fills dynamically once you create a node group.

### Usage

Click at one of the node buttons, then move the mouse into the viewport. The created node sticks at the mouse. Click again to release it.
