## Movie Clip Editor Modes

The Movie Clip Editor is three editors in one. And the Clip editor in mask mode looks also different. So we need to explain the content for all three editor types plus the Mask mode.

## View Menu in Mask and Tracking mode in Clip sub mode

The View menu contains all View related tools.

### Toolbar

Shows or hides the toolbar at the left.

### Sidebar

Shows or hides the sidebar at the right in the viewport.

### Adjust Last Operation

Shows the adjust last operation panel down left.

### Frame Selected

Zooms to the selection.

### View All

View all zooms in or out in the viewport until all selected objects are displayed fitting in the viewport.

### View Fit

View all zooms in or out in the viewport to fit the current selection into the viewport.

### Center View to Cursor

Center Cursor centers the view to the 2D cursor.

## Zoom In

Zooms into the view.

## Zoom Out

Zooms out of the view.

## Fractional Zoom

A set of predefined zoom factors.

---

## Area

This menu contains general view functionality. And exists in most other editor types too.

## Horizontal Split

Splits the current view horizontally into two independent editor windows.

## Vertical Split

Splits the current view vertically into two independent editor windows.

## Duplicate Area into New Window

Duplicate Area into New Window makes the selected editor window floating. You can then drag it around at the monitor. It is not connected with the rest of the UI anymore.

A separated window cannot be merged into the main window again. You have to close it when not longer needed.

## Toggle Maximize Area

Displays the editor maximized with menus.

To return from the maximized view press hotkey ctrl + spacebar. Or reuse the menu item in the area menu.

## Toggle Full screen Area

Displays the editor maximized without menus.

To return from the full screen view press hotkey ctrl + alt + spacebar.

## View Menu in Graph sub mode

The View menu contains all View related tools.

### Center Current Frame

Centers the view at the current frame.

### View All

Views all content.

### Show Seconds

Option. Display the timeline numbering in seconds instead of frames.

### Sync Visible Range

Option. Synchronize the visible timeline range with other time based editors.

## Area

This menu contains general view functionality. And exists in most other editor types too.

### Horizontal Split

Splits the current view horizontally into two independent editor windows.

### Vertical Split

Splits the current view vertically into two independent editor windows.

### Duplicate Area into New Window

Duplicate Area into New Window makes the selected editor window floating. You can then drag it around at the monitor. It is not connected with the rest of the UI anymore.

A separated window cannot be merged into the main window again. You have to close it when not longer needed.

### Toggle Maximize Area

Displays the editor maximized with menus.

To return from the maximized view press hotkey ctrl + spacebar. Or reuse the menu item in the area menu.

## Toggle Full screen Area

Displays the editor maximized without menus.

To return from the full screen view press hotkey ctrl + alt + spacebar.

## View Menu in Dope sheet sub mode

The View menu contains all View related tools.

## Show Seconds

Option. Display the timeline numbering in seconds instead of frames.

## Sync Visible Range

Option. Synchronize the visible timeline range with other time based editors.

## Area

This menu contains general view functionality. And exists in most other editor types too.

## Horizontal Split

Splits the current view horizontally into two independent editor windows.

## Vertical Split

Splits the current view vertically into two independent editor windows.

## Duplicate Area into New Window

Duplicate Area into New Window makes the selected editor window floating. You can then drag it around at the monitor. It is not connected with the rest of the UI anymore.

A separated window cannot be merged into the main window again. You have to close it when not longer needed.

## Toggle Maximize Area

Displays the editor maximized with menus.

To return from the maximized view press hotkey ctrl + spacebar. Or reuse the menu item in the area menu.

## **Toggle Full screen Area**

Displays the editor maximized without menus.

To return from the full screen view press hotkey ctrl + alt + spacebar.
