### NLA Editor - Edit Menu

This menu contains functionality to manage the keyframes.

## Transform

### Grab/Move

Moves the selected keyframe(s).

### Extend

Moves the last keyframes of the selection.

### Scale

Scales the selected keyframes. You need to have more than one keyframe selected.

## Snap

Snaps the selected keyframes by the chosen method.

## Duplicate

Duplicate selected keyframes.

## Linked Duplicate

Duplicates the selected strip(s), and creates a new track for the duplicates. This copy is linked to the original action strip. Modifications at the original will also affect the linked action strip.

Linked strips are visually different from normal strips. And when you start to modify the linked duplicate, then the original strip will turn red.

## Split Strips

Splits the selected strip(s) at the marker position.

## Delete Strips

Deletes the selected strips.

## Delete Tracks

Deletes the selected track(s).

## Toggle Muting

Disables the selected action clip. Be careful, there is no visual hint if the clip is muted or not.

## Apply Scale

Applies the current scale of the clips to be 1.

## Clear Scale

Resets the scale of the clip back to 1.

## Sync Action Length

Synchronize the length of the action with the keyframe length used in the strip.

## Make Single User

You can create linked duplicates. Make single user makes them into individual clips.

## Swap Strips

Swaps the selected strips.

## Move strips up

Moves the selected action strips upwards into the next track.

## Move Strips down

Moves the selected action strips downwards into the next track.

## Track Ordering

Order the tracks.

## Remove Empty Animation Data

Removes action clips that are empty.

## Start Tweaking Strip Actions

Allows you to edit the keyframe data within the Action strip. The strip will turn grey, and in the Dope Sheet editor you will find the keyframes again, which you can tweak now.

## Start Editing Stashed Actions

Same as Start Tweaking Strip Actions. But with Solo already ticked. Which allows editing of the animation data for this strip only.
