Introduction

The interaction concept for Bforartists is the graphical UI. And so the Bforartists keymap is as reduced as possible. It still contains most of the standard navigation hotkeys, and also standard hotkeys like for copy and paste, but nearly all hotkeys for tools are removed. So that users can implement their own hotkeys how they need it and when they need it.

The keymap that you can find in the Input Manager in the User Preferences is nevertheless still pretty heavy as you can see here. That's because the Input Manager in the user preferences contains all available user interaction. And not just the usual hotkeys to call tools like in other software. There is no distinction between tools and things like editor manipulation. Every user interaction is defined here. So be careful what you change at the here listed input nodes. You may remove a vital part to deal with windows for example.

The hotkeys are also editor specific. So there are lots of repetitions when you need the same hotkeys across several editors too. Navigation hotkeys for example.

Legend

dbl- = Double tap

Window

Name	Function	Menu location	Hotkey
Reload Startup File	Creates a new scene	Header / New	Ctrl N
Open Blender File	Open Blender file	Header / Open	Ctrl O
Save Blender File	Save Blender File	Header / Save	Ctrl S
Save As Blender File	Save As Blender File	Header / Save as	Shift Ctrl S
Call Menu	Calls the Quick Favourites menu	No Location	Q
Call Menu	Unknown. N dof device for 3dConnexion	No Location	N dof Menu
Context Scale Float	Unknown. N dof device for 3dConnexion	No Location	N dof Plus
Context Scale Float	Unknown. N dof device for 3dConnexion	No Location	N dof Minus
Context Scale Float	Unknown. N dof device for 3dConnexion	No Location	Shift N dof Plus
Context Scale Float	Unknown. N dof device for 3dConnexion	No Location	Shift N dof Minus
Update Reports Display	Unknown	No Location	Timer
Search Menu	Search Menu	Header / Edit Menu / Operator Search	F4
Toggle System Console	Toggles System Console - Windows only, makes problems on Linux.	Header / Window Menu / Toggle System Console	F2

Screen

Screen / Screen (Global)

Name	Function	Surface menu location	Hotkey
Animation Step	Unknown	No Location	Timer 0
Region Alpha	Unknown	No Location	Timer Region

Screen / Screen (Global)			
Toggle Maximize Area	Toggles the current selected editor between Fullscreen and Windowed. WITHOUT menus	Right Mouse menu of the menu bars	Ctrl Spacebar
Toggle Maximize Area	Toggles the current selected editor between Fullscreen and Windowed. WITHOUT menus	Right Mouse menu of the menu bars	Ctrl Alt Spacebar
Cycle Space Context	Calls a pie menu to switch between modes.	None	Ctrl Tab
Cycle Workspace	Cycle through the workspaces	None	Ctrl Page Up
Cycle Workspace	Cycle through the workspaces	None	Ctrl Page Down
Toggle Quad View	Toggle Quad View	3D View / View Menu / Area Menu / Toggle Quad View	Ctrl Alt Q
Execute File Window	Execute. Like entering a value, then press enter	None	Return
Execute File Window	Execute. Like entering a value, then press enter	None	Numpad Enter
Cancel File load	Cancel file load	None	Esc
Undo	Undo	Sometimes in Object menu, sometimes in Edit menu. Also in 3D View Toolshelf / History	Ctrl Z
Redo	Redo Sometimes in Object menu, sometimes in Edit menu. Also in 3D View Toolshelf / History	Sometimes in Object menu, sometimes in Edit menu. Also in 3D View Toolshelf / History	Shift Ctrl Z
Render Image / Animation	Render a single image	Info Editor / Render / Render Image	F12
Render Image / Animation	Render animation sequence	Info Editor / Render / Render Animation	Ctrl F12
Cancel Render View	Escapes the Render View	No Menu entry	Esc
Show / Hide Render View	Show / Hide Render View	Header / Render / Show / Hide Render View	F11
Play Rendered Animation		Header / Render menu / View Animation	Ctrl F11
Flip Region	flips tool shelf or sidebar to the other side	None	F5

Screen /Screen Editing			
Name	Function	Surface menu location	Hotkey
Handle Area Action Zones	Split / Join window code. Needed for Move Area edges and Area Options	None	Left Mouse
Handle Area Action Zones	Make new floating window. First part. You need both parts.	None	Shift Left Mouse
Handle Area Action Zones	Drag into other editor window to swap position with it. First part. You need both parts.	None	Ctrl Left Mouse
Split area	Split Area code	None	Action Zone Area
Join Area	Join Area code	None	Action Zone Area
Duplicate Area into new Window	Make new floating window. Second part. You need both parts.	None	Shift Action Zone Area

Screen /Screen Editing			
Swap Areas	Drag into other editor window to swap position with it. Second part. You need both parts.	None	Ctrl Action Zone Area
Scale Region Size	Scale Region Size	None	Action Zone Region
Toggle Fullscreen Area	Toggle Fullscreen Area	None	Action Zone Fullscreen
Move Area Edges	Split Windows	None	Left Mouse
Area Options	Join Windows	None	Right Mouse

Screen / Header			
Name	Function	Surface menu location	Hotkey
Header Context Menu	Calls the Right Mouse menu at headers	Every header menu bar	Right Mouse

Screen / Footer			
Name	Function	Surface menu location	Hotkey
Footer Context Menu	Calls the Right Mouse menu at the footer	Footer	Right Mouse

View 2D			
Name	Function	Surface menu location	Hotkey
Scroller Activate	Zooms in and out in Compositing and Texture Node editor	None	Left Mouse
Scroller Activate	Zooms in and out in Compositing and Texture Node editor	None	Middle Mouse
Pan View	Pans the view in Compositing and Texture Node editor	None	Middle Mouse
Pan View	Pans the view in Compositing and Texture Node editor	None	Shift Middle Mouse
Pan View	Pans the view in Compositing and Texture Node editor	None	Mouse/ Trackpad pan
Scroll right	Zooms in and out in Compositing and Texture Node editor	None	Ctrl Wheel down
Scroll left	Zooms in and out in Compositing and Texture Node editor	None	Ctrl Wheel up
Scroll down	Zooms in and out in Compositing and Texture Node editor	None	Shift Wheel down
Scroll up	Zooms in and out in Compositing and Texture Node editor	None	Shift Wheel up
NDOF Pan/Zoom	Ndof device for 3dConnexion	None	Ndof Motion
Zoom out	Zooms in and out in Compositing and Texture Node editor	UV Editor / View / View Zoom Out	Wheel out
Zoom in	Zooms in and out in Compositing and Texture Node editor	UV Editor / View / View Zoom In	Wheel in
Zoom out	Zooms in and out in Compositing and Texture Node editor	None	Numpad -
Zoom in	Zooms in and out in Compositing and Texture Node editor	None	Numpad +

View 2D			
Zoom 2D View	Zooms in and out in Compositing and Texture Node editor	None	Ctrl Mouse/ Trackpad pan
Smooth view 2D	???	None	Timer 1
Scroll down	Zooms in and out in Compositing and Texture Node editor	None	Wheel down
Scroll up	Zooms in and out in Compositing and Texture Node editor	None	Wheel up
Scroll right	Zooms in and out in Compositing and Texture Node editor	None	Wheel down
Scroll left	Zooms in and out in Compositing and Texture Node editor	None	Wheel up
Zoom 2D View	Zooms in and out in Compositing and Texture Node editor	None	Ctrl Middle Mouse
Zoom 2D View	Zooms in and out in Compositing and Texture Node editor	None	Mouse/Trackpad Zoom
Zoom Border	Calls the Zoom border navigation in Compositing and Texture Node editor	None	Shift B

View 2D Buttons List			
Name	Function	Surface menu location	Hotkey
Scroller Activate	UV Editor Toolshelf navigation	None	Left Mouse
Scroller Activate	UV Editor Toolshelf navigation	None	Middle Mouse
Pan View	UV Editor Toolshelf navigation	None	Middle Mouse
Scroller Activate	UV Editor Toolshelf navigation	None	Mouse /Trackpad Pan
Scroll down	UV Editor Toolshelf navigation	None	Wheel down
Scroll up	UV Editor Toolshelf navigation	None	Wheel up
Scroll down	UV Editor Toolshelf navigation	None	Page down
Scroll up	UV Editor Toolshelf navigation	None	Page Up
Zoom 2D View	UV Editor Toolshelf navigation	None	Ctrl Middle Mouse
Zoom 2D View	UV Editor Toolshelf navigation	None	Mouse/ Trackpad Zoom
Zoom 2D View	UV Editor Toolshelf navigation	None	Ctrl Mouse/Trackpad Pan
Zoom out	UV Editor Toolshelf navigation	None	Numpad -
Zoom in	UV Editor Toolshelf navigation	None	Numpad +
Reset View	UV Editor Toolshelf navigation	None	Home

User Interface			
Name	Function	Surface menu location	Hotkey
Eyedropper	???	None	E
Eyedropper Colorband	???	None	E
Eyedropper Colorband (points)	???	None	Alt+E
Eyedropper Datablock	???	None	E
Eyedropper Depth	???	None	E
Copy Data Path	Copy Data Path	None	Shift Ctrl C
Copy Data Path	Copy Data Path	None	Shift Ctrl Alt C

User Interface

Insert Keyframe (Buttons)	Insert Keyframes at buttons	None	I
Delete Keyframe (Buttons)	Delete Keyframes at buttons	None	Alt I
Clear Keyframe (Buttons)	Clears Keyframes at buttons	None	Shift Alt I
Add Driver	Add Driver	None	Ctrl D
Remove Driver	Remove Driver	None	Ctrl Alt D
Add to Keying Set	Add to Keying Set	None	K
Remove from Keying Set	Remove from Keying Set	None	Alt K

3D View

3D View / 3D View (Global)

Name	Function	Surface menu location	Hotkey
Reset 3D View	Resets the 3D View		Numpad *
Set 3D Cursor	Sets the 3D cursor position to Mouse position.	None	Alt Right Mouse
Move	Transform	None	Tweak Right Any
Local View	Switches to local view and back, just showing the selection then	3D View / View menu	Numpad /
Rotate View	Rotate view	None	Right Mouse
Pan View	Move view	3D view / tool shelf /tools tab / transform panel / Translate Button	Shift Middle Mouse
Zoom View	Zoom view. See also the other zoom methods.	3D view / tool shelf /tools tab / transform panel / Scale Button	Ctrl Middle Mouse
Dolly View	Dolly View moves the World camera forward or backward. Be careful with that one! You can trap yourself that regular zoom seems to have no more effect.	3D Viewport / View / Navigation / Dolly Zoom	Shift Ctrl Middle Mouse
View Selected	Brings the selected object into focus. With all regions.	3D Viewport / View / View Selected all Regions	Ctrl Numpad 0
View Selected	Brings the selected object into focus	3D Viewport / View / View Selected	Numpad 0
Smooth View	???	None	Timer 1
Rotate View	Rotates the view with trackpad	None	Mouse/Trackpad pan
Rotate View	Rotates the view with trackpad	None	Mouse/Trackpad Rotate
Move View	Moves the view with trackpad	None	Shift Mouse/Trackpad pan
Zoom View	Zooms the view with trackpad	None	Mouse/Trackpad Zoom
Zoom View	Zooms the view with trackpad	None	Ctrl Mouse/Trackpad pan
Zoom View	Zooms in	3D Viewport / View / View Selected	Numpad +
Zoom View	Zooms out	3D Viewport / View / View Selected	Numpad -
Zoom View	Zooms in	None	Ctrl = (german keyboard Ctrl *)
Zoom View	Zooms out	None	Ctrl -
Zoom View	Zooms in	None	Wheel in
Zoom View	Zooms out	None	Wheel out

3D View / 3D View (Global)			
Dolly View	Moves in. Dolly View moves the World camera forward or backward. Be careful with that one! You can trap yourself that regular zoom seems to have no more effect.	None	Shift Numpad +
Dolly View	Moves out. Dolly View moves the World camera forward or backward. Be careful with that one! You can trap yourself that regular zoom seems to have no more effect.	None	Shift Numpad -
Dolly View	Moves in. Dolly View moves the World camera forward or backward. Be careful with that one! You can trap yourself that regular zoom seems to have no more effect.	None	Shift Ctrl = (german keyboard Shift Ctrl *)
Dolly View	Moves out. Dolly View moves the World camera forward or backward. Be careful with that one! You can trap yourself that regular zoom seems to have no more effect.	None	Shift Ctrl -
View Camera center			Home
