Sidebar - View tab

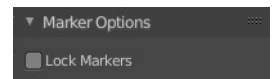

The view tab contains further options.

Marker options panel

Lock Markers

Make the markers uneditable.

The Drivers editor does not have Markers. This panel is dysfunctional and obsolete here. And will vanish soon

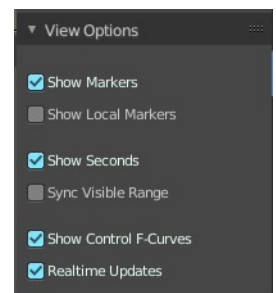

Sidebar - View options panel

Show Markers

Display the markers.

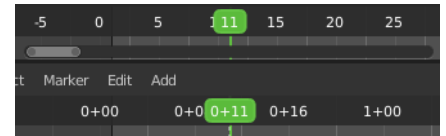

Show Local Markers

Show action-local markers on the strips.

Show Seconds

Show the timing in the timeline area in seconds instead of frames.

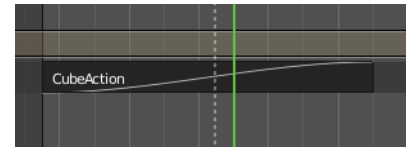

Sync visible range

Synchronize the visible timeline range with other visible time based editors.

Show Control F-Curves

Shows existing f-curves in the action strip. Like for keyframed Animated influence.

Real-time Updates

When transforming strips in the NLA editor, the other animation editors updates too.
