Edit Mode - Fonts Menu

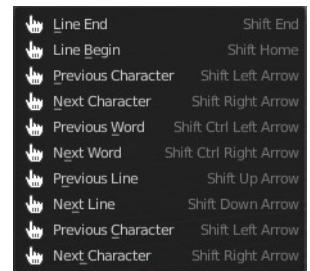

Special Characters

Special characters is a sub menu that contains some special text characters, like copyright, which you can insert into the text.

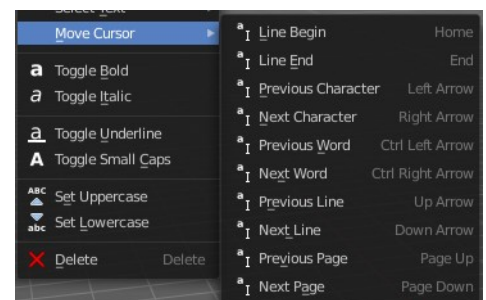

Select Text

Select text is a sub menu that contains selection functionality, starting from the current position of the Textcursor. The buttons should be self explaining. And usually you use the hotkeys for this functionality.

Move Cursor

Set the cursor at specific positions in the text.

Toggle Bold

Bold sets the selected letters to be displayed as bold letters.

Toggle Italic

Italic sets the selected letters to be displayed as italic letters.

Toggle Underline

Underline sets the selected letters to be displayed as underlined letters.

Toggle Small Caps

Toggle small caps sets the selected letters to be displayed as if they were upper case letters, but with lower case size.

Set Uppercase

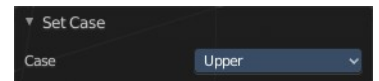

Sets the selected text to be uppercase letters.

Set Lowercase

Sets the selected text to be uppercase letters.

Last Operator Set Case

Set Case has one Last Operator for all items.

Kerning

Kerning is the distance between letters. Here you can increase, decrease and reset the kerning.

Decrease Kerning

Decreases the distance between the letters.

Increase Kerning

Increases the distance between the letters.

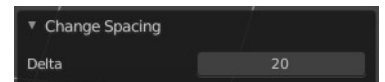

Reset Kerning

Resets the distance between the letters to the default values from the font.

Last Operator Change Spacing

Delta

Here you can adjust the spacing. The range goes from -20 to 20.

Delete

Deletes the selected text.
