All Modes - Navigation Menu

The Navigation menu provides you with all tools around viewport navigation. It is available in all modes.

Orbit Down

Orbits downwards.

Orbit Up

Orbits upwards.

Orbit Right

Orbits to the right.

Orbit Left

Orbits to the left.

Orbit Opposite

Rotates the view by 180 degree.

Navi	Select	Add	Object
	Orbit Down		Numpad 2
	Orbit Up		Numpad 8
	Orbit Right		Numpad 6
	Orbit Left		Numpad 4
	Orbit Opposite		Numpad 9
	Roll Left		
	Roll Right		
	Pan Down		Ctrl Numpad 2
	Pan Up		Ctrl Numpad 8
	Pan Right		Ctrl Numpad 6
	Pan Left		Ctrl Numpad 4
	Zoom Region		Shift B
	Zoom In		Numpad +
	Zoom Out		Numpad -
	Zoom Camera 1:1		
	Dolly View		Shift Ctrl Middle Mouse
	Center View to Mouse		Alt Middle Mouse
	Fly Navigation		
	Walk Navigation		
	View Navigation (Walk/Fly)		Shift `
	Playback Animation		Spacebar
	Move		W
	Rotate		E
	Scale		R

Roll Left

Rolls the viewport counter clockwise.

Roll Right

Rolls the viewport clockwise.

Pan Down

Pans the viewpoint downwards. The scene moves up.

Pan Up

Pans the viewpoint upwards. The scene moves down.

Pan Right

Pans the viewpoint to the right. The scene moves to the left.

Pan Left

Pans the viewpoint to the left. The scene moves to the right.

Zoom Region

Draws a rectangle and zooms then to fit the size of this rectangle.

Zooming in is done with drawing the rectangle with left mouse button. Zooming out is done with drawing the rectangle with middle mouse button.

Zoom In

Zooms into the viewport. Works also in camera view.

Zoom Out

Zooms out of the viewport. Works also in camera view.

Zoom Camera 1:1

Zooms the camera fitting to match the render output size by factor 1:1

Dolly View

Dolly View is a special zoom mode.

Be careful with this navigation method, you can easily trap yourself to not zoom able anymore!

Center View to Mouse

Centers the view to the current mouse position.

Fly Navigation

Switches to Fly navigation. In this view mode the camera acts like an air plane. Right click leaves the fly mode.

Walk Navigation

Switches to Walk Navigation. In this view mode the camera acts like a player in a first person shooter. Gravity will pull you down, The ground grid is the ground. And you can move around with wasd keys. Right click leaves the walk mode.

View Navigation

Switches to View Navigation Mode. In this view mode the view gets rotated moved and scaled from the Camera view point. Right Click leaves the view mode.

Playback Animation

Plays back an existing animation.

Move

Moves the selected object in the viewport by moving the mouse.

Last Operator *Move*

Move X , Y, Z

Here you can adjust the position values for the three values

Orientation

Orientation is a drop-down box where you can choose the type of orientation for the transform action.

Proportional Editing

When you turn on proportional editing then further settings appears.

Proportional Editing is a drop-down box where you can choose to use proportional editing. When you choose one of the active methods then the neighbour geometry gets influenced by Shrink/Fatten too in a proportional way.

Proportional Falloff

Proportional Editing Falloff is a drop-down box where you can choose a method for the falloff for the proportional editing.

Proportional Size

Proportional size is a edit box where you can adjust the strength of the Proportional falloff.

Connected

Just edit geometry that is directly connected with the current selection.

Projected (2D)

Edit geometry that is in 2d space aligned with the current selection. This one goes from the current view in depth direction.

Rotate

Rotates the selected object in the viewport by moving the mouse.

Last Operator *Rotate*

Angle

Here you can adjust the rotation angle.

Axis

Around which axis to rotate. X, Y or Z.

Orientation

Orientation is a drop-down box where you can choose the type of orientation for the mirroring action.

Proportional Editing

When you turn on proportional editing then further settings appears.

Proportional Editing is a drop-down box where you can choose to use proportional editing. When you choose one of the active methods then the neighbour geometry gets influenced by Shrink/Fatten too in a proportional way.

Proportional Falloff

Proportional Editing Falloff is a drop-down box where you can choose a method for the falloff for the proportional editing.

Proportional Size

Proportional size is a edit box where you can adjust the strength of the Proportional falloff.

Connected

Just edit geometry that is directly connected with the current selection.

Projected (2D)

Edit geometry that is in 2d space aligned with the current selection. This one goes from the current view in depth direction.

Scale

Scales the selected object in the viewport by moving the mouse.

Last Operator Scale

Scale X Y Z

Here you can adjust the position values for the three values

Orientation

Orientation is a drop-down box where you can choose the type of orientation for the mirroring action.

Proportional Editing

When you turn on proportional editing then further settings appears.

Proportional Editing is a drop-down box where you can choose to use proportional editing. When you choose one of the active methods then the neighbour geometry gets influenced by Shrink/Fatten too in a proportional way.

Proportional Falloff

Proportional Editing Falloff is a drop-down box where you can choose a method for the falloff for the proportional editing.

Proportional Size

Proportional size is a edit box where you can adjust the strength of the Proportional falloff.

Connected

Just edit geometry that is directly connected with the current selection.

Projected (2D)

Edit geometry that is in 2d space aligned with the current selection. This one goes from the current view in depth direction.
