Collection Properties Tab

The world tab provides you with collection related settings.

Restrictions Panel

Set restrictions for the selected collection(s).

Selectable

Make this collection and its content selectable.

Disable in Renders

Don't render this collection and its content.

Holdout

Mask out objects in collection from view layer.

Indirect Only

Make the objects in the collection just contribute indirectly. By light or shadow or reflections.

Instancing panel

Instance Offset

Adjust an offset from the origin when instancing the collection.

Line Art Panel

Usage

The method to display the line art in this collection.

- Include
- Occlusion Only
- Exclude
- Intersection Only
- No Intersection
- Usage

Include

Generate feature lines for this collection.

Occlusion Only

Only use the collection to produce occlusion.

Exclude

Don't use this collection in line art.

Intersection only

Only generate intersection lines for this collection

No Intersection

Include this collection but do not generate intersection lines.
