### Add menu - Geometry nodes - Grease Pencil - Read

The nodes in this submenu are node groups. They use the regular single nodes under the hood.

It is virtually impossible to document these nodes in detail. So we will just list them.

When you double click the header, then you will enter the first level of the group. When you then press tab, or click again at the header, then you will reach the single nodes.

To leave the group you can use the breadcrumb up left in the header. These breadcrumbs are clickable. Or the Parent Node Tree button up right in the header.

## Layer Size

Retrieve the point count and spline count of a grease pencil layer.

## Material Fill Info

Retrieve the color and opacity of a grease pencil layer.

## Stroke Info

Retrieve the color, opacity and softness of a grease pencil stroke.
