Collection Properties Tab

The world tab provides you with collection related settings.

Restrictions Panel

Set restrictions for the selected collection(s).

Selectable

Make this collection and its content selectable.

Disable in Renders

Don't render this collection and its content.

Holdout

Mask out objects in collection from view layer.

Indirect Only

Make the objects in the collection just contribute indirectly. By light or shadow or reflections.

Instancing panel

Instance Offset

Adjust an offset from the origin when instancing the collection.

Exporters panel

This panel contains the collection settings to assign an exporter per collection, where you can batch export collections in multiple file formats.

Note: You can also batch export collections from the Topbar File header menu.

Add

Adds an exporter operator to the collection. This will show an exporter icon on the collection in the outliner, and list the file format the collection will export to.

File Exporter Types:

- Alembic
- USD (Universal Scene Description)
- OBJ (Wavefront Object)

Export All

Exports all the collections with exporter operators assigned.

Exporter Operators

Exporter Operator Presets

This will save exporter operator settings. Right now there are two entries for the same thing. One will be removed.

List of available presets

The list of available presets. The string *Missing Paths* indicates that no custom preset exists yet.

Add Operator Preset

Adds a new operator preset. A popup dialog will appear where you can give the new preset a name.

Presets Remove

Removes a preset.

Remove Operator Preset

Removes the active preset.

Note: *that you cannot display the current active preset. So choose it from the list, and then click at the remove operator.*

Export

Export the individual collection.

Remove Exporter

Remove the exporter operator from the collection.

File Path

Defines the path for the exported file.

File Path

The file path.

Browse File Path

Open and browse for the file path.

Exporter Operator Properties

These are the same properties from the file type export properties.

Line Art Panel

Usage

The method to display the line art in this collection.

Include

Generate feature lines for this collection.

Occlusion Only

Only use the collection to produce occlusion.

Exclude

Don't use this collection in line art.

Intersection only

Only generate intersection lines for this collection

No Intersection

Include this collection but do not generate intersection lines.

Collection Mask

Use custom intersection masks for faces in this collection.

Masks

You can use up to 8 masks, starting with value 0.

Intersection Priority

Assign intersection priority value for this collection.

Priority Value

The intersection line will be included into the object with the higher intersection priority value.
