Edit Mode - Text Menu

Cut

Cuts the selection.

Copy

Copies the selection.

Paste

Pastes a copied selection.

Paste File

Opens the file browser where you can choose a text file to paste the text from. It needs to be UTF8.

To Uppercase

Sets the selected text to be uppercase letters.

To Lowercase

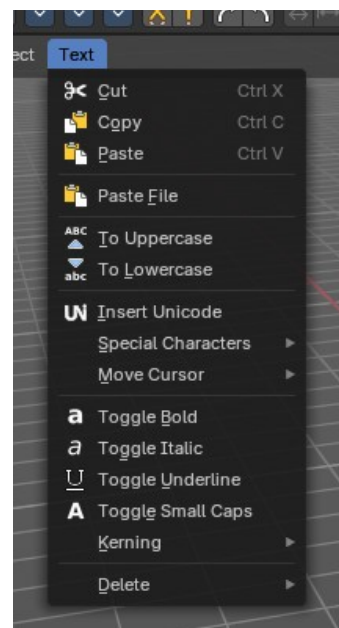

Sets the selected text to be uppercase letters.

Last Operator Set Case

Set Case has one Last Operator for all items.

Insert Unicode

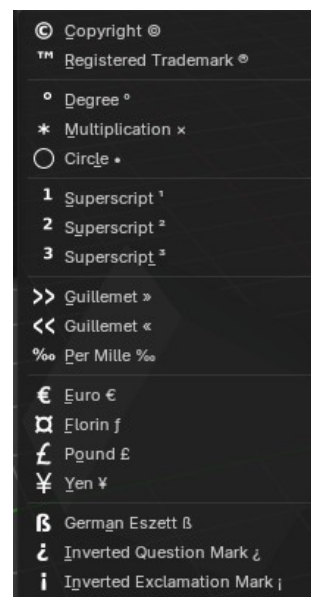

Inserts a Unicode character. When you use the operator, a dialogue box will prompt you to enter a Unicode codepoint hex value to insert the character.

Special Characters

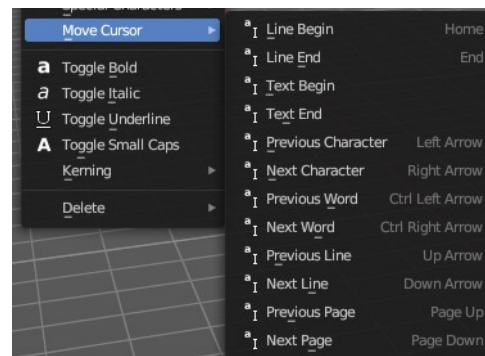

Special characters is a sub menu that contains some special text characters, like copyright, which you can insert into the text.

- Copyright ©
- Registered Trademark ™

Move Cursor

Set the cursor at specific positions in the text.

Toggle Bold

Bold sets the selected letters to be displayed as bold letters.

Toggle Italic

Italic sets the selected letters to be displayed as italic letters.

Toggle Underline

Underline sets the selected letters to be displayed as underlined letters.

Toggle Small Caps

Toggle small caps sets the selected letters to be displayed as if they were upper case letters, but with lower case size.

Kerning

Kerning is the distance between letters. Increase, decrease and reset the kerning.

Decrease Kerning

Decreases the distance between the letters.

Increase Kerning

Increases the distance between the letters.

Reset Kerning

Resets the distance between the letters to the default values from the font.

Last Operator Change Spacing

Delta

Adjust the spacing. The range goes from -20 to 20.

Delete

Deletes the selected text.
