Set Handle Type

Handles defines the type of handle for the knots of the curve. You have the choice between Auto, Vector, Align and Free.

Free

Set Handle type to Free.

Auto

Auto aligns the handles automatically.

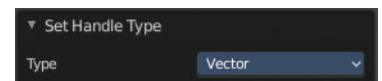

Vector

Set Handle type to Vector.

Align

Set Handle type to Align.

Last Operator Set Handle Type

Type

Type is a drop-down box where you can set the handle type. You have the choice between Auto, Vector, Align, Free. And the fifth possibility toggles between Free and Align.
